CDT CODE	NOMENCLATURE	RANGE (arch, quadrant or tooth)	BENEFIT AND FREQUENCY LIMITATIONS (AGES 0-20)	BENEFIT AND FREQUENCY LIMITATIONS (AGE 21 AND OLDER)	AUTH REQUIRED	DOCUMENTATION REQUIRED
<b>GENERAL NOTES</b>						
1) All benefits are based on the calendar year. 2) If a CDT code is not listed on this Schedule of Covered Services the service is not covered; the member is responsible for the full fee charged by the dentist. 3) Services are only payable when provided by an affiliated dentist in the Avēsis network; there are no out-of-network benefits. 4) N/A refers to "Not Applicable." 5) Effective for dates of service on or after May 1, 2021, the Illinois Department of Healthcare and Family Services (HFS) will be temporarily amending children benefit limitations for certain dental services. Please note the following CDT code benefit changes to the dental benefit grid are effective for children until the public health emergency no longer exists.						
<b>Claims Processing Notes</b>						
1) Services that require an arch should be reported with "01" (upper) or "02" (lower). 2) Services that require a quadrant should be reported with "10" (UR), "20" (UL), "30" (LL) and "40" (LR). 3) Supernumerary primary teeth are identified by adding "S" after the tooth letter. 4) Supernumerary permanent teeth are identified by adding "50" to the tooth number. 5) Service(s) on a primary tooth is not payable if exfoliation is imminent.						
<b>DIAGNOSTIC</b>						
<b>Clinical Oral Evaluations</b>						
1) The collection and recording of some data and components by the dental examination may be delegated; however, the evaluation, which includes diagnosis and treatment planning is the responsibility of the dentist. 2) There is no distinction made between the evaluations provided by general practitioners and specialists.

<b>Anesthesia</b>						
<p>1) All licensed dentists who provide conscious sedation or deep sedation/general anesthesia must have an anesthesia permit. Permit A is required for moderate sedation (conscious sedation) regardless of the route of administration. Permit B is required for deep sedation/general anesthesia. Neither permit is required if the dentist is providing an oral medication or nitrous oxide analgesia to reduce anxiety.</p> <p>2) General anesthesia, intravenous sedation, conscious sedation and nitrous oxide are only payable in conjunction with a covered dental procedure.</p> <p>3) Requests for sedation and general anesthesia will be reviewed on a case-by-case basis. A case will be covered for patients with physical or mental health problems of such severity that treatment cannot be attempted without. Sedation and general anesthesia may be allowed when a surgical procedure is being rendered.</p> <p>4) Acceptable conditions for general anesthesia include: toxicity to local anesthesia supported by documentation, severe intellectual disability, severe physical disability uncontrolled management problem, extensive or complicated surgical procedures, failure of local anesthesia, documented medical complications and/or acute infection that would preclude the efficacy of local anesthesia. Apprehension alone is not typically considered medically necessary.</p> <p>5) For cases requiring sedation, the following must be documented in the patient's chart for appropriate psychosomatic disorders: diagnosis, description of past evidence of situational anxiety or uncontrolled behaviors. In the case of a referral due to uncontrolled behavior, the name of the referring dentist must be included.</p> <p>6) Chart audits may be performed to verify all criteria has been met. Services not documented as required may be denied for payment.</p> <p>7) Local anesthesia is included in the fee for the procedure.</p> <p>8) D9310 will only be reimbursed to a dentist other than the one providing definitive treatment. When billing, a copy of the written report must be attached. When the consulting dentist performs the service, reimbursement will be limited to the actual services rendered.</p> <p>9) Anesthesia time begins when a doctor administering the anesthetic agent initiates the appropriate anesthesia and non-invasive monitoring protocol and remains in continuous attendance of the patient.</p> <p>10) Anesthesia services are considered completed when the patient may be safely left under the observation of trained personnel and the doctor may safely leave the room to attend to other patients or duties.</p> <p>11) The level of anesthesia is determined by the anesthesia provider's documentation of the anesthetics effects upon the central nervous system and not dependent upon the route of administration.</p>
