

Diabetic Supplies Covered Under CountyCare in 2022

Your doctor may recommend medications or diagnostic supplies that are used to treat your medical condition. These may be considered an over-the-counter product (OTC). An OTC is a medication or product that can be sold directly to the member without a requirement for a prescription from a doctor. **Although a prescription is not required for an OTC, if you would like to have the OTC covered at zero cost through the pharmacy benefit, please contact your doctor for a prescription to be submitted to your pharmacy.** Your doctor will decide the amount of the OTC needed. Please talk to your doctor about your choices.

Here is a list of over-the-counter diabetic products that are currently covered by CountyCare in 2022

As always, the Pharmacy Benefits section of CountyCare’s website is continually updated. Once you access our Pharmacy Benefits section [here](#), you will see the following highlighted sections:

- Preferred Drug List
- Preferred Drug List Search Tool
- Find a Pharmacy Tool
- Prior Authorization Process / Medication Request Form

The Preferred Drug List search tool is designed to facilitate easy identification of medications covered by your Plan. The tool also provides information on drug coverage (preferred/non-preferred) including age limits, quantity limits, or necessary prior authorization.

The drug information you find in the **Preferred Drug List** search tool may assist in your conversations with your doctor concerning your care.

CountyCare Health Plan is proud to be your health care partner. We are here to help you. If you cannot find what you need on our website, feel free to call us. **We can be reached at 1-312-864-8200, 711 (TDD/TYY).**
