Provider Relations Update

Attention CountyCare Providers,

In the coming months, CountyCare will be transitioning to a new provider relations staff, while existing staff will be transitioning to new roles. During this time, your existing Provider Relations Representative and contact may change. For providers with regular standing meetings, you can expect communication directly from your Provider Relations team, including your current representative regarding this change.

While the transition is occurring we will be using a simplified version of our provider relations contact sheet found [here](#). Once the transition is complete, we will provide an updated Provider Representative listing by service/contract type.

If you have questions regarding your assigned representative, please contact us as at ProviderServices@countycare.com.
